

Circuits + CBL Reflection Assignment: fall 2019

(due 5pm on Friday immediately following the Monday CBL session; please submit to appropriate folder on Box.)

Please reflect on your Circuits + CBL experience from the past week and write short responses (a few sentences to a paragraph) for each of the following:

1. What did you learn from your CBL experience this week (could be anything, including effective communication with elementary school students or your W&L peers to Circuits concepts, etc)?
2. What elements of the overall experience went well this week?
3. What were some challenges you encountered? How did you respond to them in the moment?
4. How could this Circuits activity and/or weekly CBL experience be improved in the future?
5. What was the most surprising thing that happened—good, bad, or otherwise? Why was it surprising and what did you learn from it?
